

MD. SAKIB HASAN

Infrastructure & Network Operations Engineer | Security Operations / Incident Response Track

Dhaka, Bangladesh | +8801760142822 | sakibhasan.infosec@gmail.com

[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Infrastructure and Network Operations Engineer with hands-on experience supporting Huawei 5G Core infrastructure and Grameenphone SOC operations, including UDM, AAA, ENUM, servers, network devices, and infrastructure monitoring. Experienced in 24x7 monitoring, alarm detection, incident triage, escalation, network troubleshooting, system logging, KPI analysis, operational reporting, and cross-functional incident coordination. RHCSA certified with a strong foundation in TCP/IP networking, Linux administration, system hardening, privileged access management, firewall/VPN operations, virtualization, and infrastructure monitoring. Currently pursuing an MSc in IT System Security and transitioning toward Security Operations, Incident Response, Threat Detection, and Cybersecurity Engineering.

CORE TECHNICAL SKILLS

Security Operations: Incident detection and triage, alarm analysis, escalation, incident documentation, log analysis fundamentals, security monitoring, SOP compliance, operational reporting

Linux & Infrastructure: RHEL, Ubuntu, SSH, user and permission management, system hardening, Bash, system logging, infrastructure monitoring

Cloud & Virtualization: AWS EC2, VPC, IAM, S3, Huawei FusionCloud, VMware ESXi, VirtualBox, Docker

Networking & Security: TCP/IP, DNS, DHCP, VLAN, routing, network segmentation, troubleshooting, firewall policies, VPN, basic hardening

Telecom & Enterprise: Huawei 5G Core, UDM, AAA, ENUM, iMaster MAE, CyberArk PAM, enterprise network operations

Automation & Tools: Python, Bash, Git, dashboard monitoring, technical documentation, operational reporting

PROFESSIONAL EXPERIENCE

Huawei Technologies Bangladesh Ltd. — Network Operations Center Engineer (L1)

Feb 2026 – Present

Grameenphone SOC | Dhaka, Bangladesh

- Monitor Huawei 5G Core platforms, including UDM, AAA, ENUM, servers, network devices, and Huawei iMaster MAE.
- Perform 24x7 infrastructure and network monitoring; identify alarms and abnormal conditions, conduct initial triage, and escalate critical incidents to L2/L3 engineering teams.
- Analyze system health, infrastructure alarms, and performance KPIs to support incident investigation and service optimization.
- Assist with network, platform, and infrastructure troubleshooting while coordinating with Huawei, ZTE, Grameenphone, and other technical teams.
- Prepare incident updates, operational reports, KPI summaries, shift handovers, and technical documentation.

Amber IT Ltd. — Assistant Network Engineer, Radio Frequency

Oct 2025 – Feb 2026

Dhaka, Bangladesh

- Assisted with RF planning, link budgeting, spectrum analysis, LOS surveys, and PTP/PTMP wireless network deployments.
- Installed, aligned, tested, and troubleshot microwave and antenna radio links; performed interference troubleshooting.
- Coordinated with NOC teams during incidents, outages, troubleshooting, and maintenance windows.
- Configured and validated L2/L3 networking components, including VLANs, trunks, and basic routing.

Isharify Limited — IT Executive, E-commerce & System Support

Nov 2024 – Oct 2025

Dhaka, Bangladesh

- Provided enterprise IT and system support for users and business operations.
- Supported network and server reliability, troubleshooting operational issues and coordinating resolution.
- Assisted in maintaining stable IT operations for e-commerce and business systems; documented issues for follow-up.

EDUCATION

Master of Science in IT System Security
Bangladesh University of Professionals (BUP) | Jan 2025 – Present | Current CGPA: 3.39/4.00

Bachelor of Science in Computer Science & Engineering
City University, Dhaka | Completed 2024 | CGPA: 2.92/4.00

CERTIFICATIONS & ACHIEVEMENTS

- **Red Hat Certified System Administrator (RHCSA)** — Linux Pathshala, 2025
- **AWS Certified Cloud Practitioner** — Amazon Web Services, 2024
- **HCIA – Cloud Computing** — Huawei-BUET ICT Academy, 2023–2024

- **Huawei ICT Competition — Cloud Track** — 7th Place, Bangladesh Round

RESEARCH PROJECTS

RF Signal Classification and Modulation Recognition using CNN–LSTM Hybrid Deep Learning Models

MSc thesis in progress focused on RF signal classification and modulation recognition for defense and security applications.

Edge Computing in the Cloud: Improving Latency-Sensitive Applications with AWS

Research on AWS-based edge and distributed infrastructure approaches for latency-sensitive applications.

RELEVANT SECURITY DEVELOPMENT

SOC fundamentals; incident response and incident handling; SIEM and security log analysis; TCP/IP and network security;

OWASP Top 10; vulnerability assessment and security testing; digital forensics fundamentals; threat detection and threat hunting; Linux security and system hardening.
